Setting**

TIMING

SETTINGS

METHODS

- **Prevention**
- **Early detection/DX**
- **Early response**
- **Stop/control transmission**
- **Correct treatment, care**
- **Efficient use of limited resources**

Adapted from D'Amour D. & Oandasan I. 2005. *J Interprofessional Care* Suppl. 1:8-20.
And further enhancements by Tufts University and DAI, Inc. of the USAID/Respond Project

Session Objectives– To Identify and Discuss

- Barriers to Cross-Sectoral Collaboration
- Strategic approaches, policy interventions, instruments and tools used to overcome barriers
- Essential characteristics of a workforce that seeks to create and implement enabling policy environments
- Identify key observations and findings on ways to use policy to achieve one health goals

Format

- Panel 1: Public Sector– Human Health, Agriculture, Environment, Natural Resources, Other
- Panel 2: Private Sector and Public Private Partnerships– human health, agriculture, environment, extractive industries, food industries, other

Roles and Responsibilities

- **Speakers**– present compelling examples of policies and approaches that enabled one health solutions
- **Moderator**– introductions, moderate discussions, keep to time
- **Audience/Session Participates**– Ask probing questions, add to experience base from own experiences
