IMPLEMENTING ONE HEALTH APPROACHES

for Private Veterinarians in Livestock Derived Food Business

Narin ROMLAMDUAN

According to FAO-OIE-WHO collaboration report in April 2010, they committed to work together closer for aligning the activities which related to animal-human-ecosystem interface, so called “One Health” in order to support member countries.

In perspective of CPF, as the private company in Thailand, we has provided meat and food products from livestock production more than 80 years. Our company’s vision in 5 years from 2008-2013 is “To provide meat and food products that are nutritious with food safety integrity to satisfy customers in each market region”

The Animal Health and Technical Service Office, CPF (Thailand) co., ltd., provides animal health solutions by specific prevention and control measures for livestock’s diseases, especially for poultry and swine production in order to produce safety food for consumers.

We are focusing on food safety, innovation, traceability, medication, vaccination, animal welfare and environmental concerns. Veterinarians who deal with livestock health in food business have to be trained about the basic issues on one health concept, biosecurity, food safety, emerging and re-emerging diseases, emergency plan for disease outbreak, early warning system and health monitoring program for diseases prevention and elimination from food chain and continuous supporting safety food for the consumers.
